Cheryl,

Please see response from auditor below. We can not split the payroll between class codes, so this dispute will be closed.

Janice,  
We can't split the payroll between warehouse and sales.  
See below.  
Thanks,  
Tammy

Standard Exception Classifications

Standard exception classifications 8810 (clerical office employees), 8742 (outside salespersons), 8748 (automobile salespersons), and 8871 (clerical telecommuters) are NOT available for division of payroll. When employees interchange between operations assigned to a Basic Classification and one of these Standard Exception Classifications, the payroll attributable to the Standard Exception Classifications listed above must be assigned to the Basic Classification. If employees interchange between these Standard Exception Classifications and two or more Basic Classifications, the payroll attributable to the Standard Exception Classifications listed above must be assigned to the Basic Classification with the largest amount of payroll applicable to the employee. If no Basic Classification represents the largest amount of payroll for an employee, the payroll attributable to the Standard Exception Classifications listed above must be assigned to the highest rated classification representing any part of that employee's work.
